

Business Case:

Inefficiency of the vacations approval mechanisms for the employees

Sector: Information Technology

Fujitsu is a Japanese multinational IT supplier to global market with its headquarters in Tokyo, Japan.

This company has approximately 172,000 employees, giving support to clients in 100 countries.

Fujitsu combines a board of IT experts and services with high quality computing products and communication and advanced microelectronics, to deliver added value to customers.

It is the world's third-largest IT services provider measured by revenues (after IBM and Hewlett-Packard).

Overview

Country: Portugal

Sector: Information
Technology

Challenge: Excel sheet used to schedule vacations of the employees. Extremely inefficient method.

Solution: Infosistema iFlow Platform.

Situation

Absence of an automatic system for holiday marking.

Challenge

In No Global Delivery Center, a Portuguese Fujitsu with hundreds of employees, The need to automate and increase the efficiency of the holiday marking system.

As the hundreds of employees are distributed in several teams, organized in several hierarchical levels, an agile and efficient solution was needed that allowed the adequate control of the marking and validation of vacations throughout the structure.

Solution

Infosistema proposed a solution based on **iFlowBPM platform**, modifying internal procedures.

Were developed iFlow processes to:

Vacations scheduling with superior approval and validation;

Consulting scheduled days by the employee and the managers;

Registration of available days by employee;

Human resource's map with scheduled vacations and taken days by each employee.

Benefits

Centralization of all information about employees vacations;

Quick and simplified access to information by employees and managers;

Monitoring current processes;

Elimination the possibility of **mistakes** and **information loss** by human failure;

Operational **costs reduction**;

Solution **available in SaaS**, rental service, monthly income;

Without necessity of end users **training**.
